

AMENDMENTS TO THE CLAIMS:

Please replace the claims with the claims provided in the listing below wherein status, amendments, additions and cancellations are indicated.

1. (Currently Amended) A method for the production of individual administration forms arranged as a stack from individual tapes, comprising:
 - a) arranging said individual tapes to a multilayered strand [[,]];
b) aligning and transporting the multilayered strand to a cross-cutting scissor, and device;
c) cutting said multilayered strand by means of said cross-cutting device, to sever a multilayered stack from said strand, said stack having a leading end; and
d) inserting the leading end of the stack into a pre-opened dispenser and transferring the stack directly into a pre-opened said dispenser.
2. (Original) A method according to claim 1, wherein said tapes have a width of between 5 and 40 mm.
3. (Currently Amended) A method according to claim 1, wherein said administration forms are [[sheet-like]] in the form of a sheet.

4. (Original) A method according to claim 1, wherein said administration forms contain therapeutic or cosmetic or food-technological products.
5. (Original) A method according to claim 1, wherein said administration forms have a weight per unit area between 10 and 50 g/m².
6. (Original) A method according to claim 1, wherein said dispenser is made of a plastic or cardboard.
7. (Original) A method according to claim 1, wherein said dispenser is a sealing bag.
8. (Original) A method according to claim 1, wherein said dispenser is a two-piece dispenser with a bottom part in the shape of a drawer and a top-part.
